PROJECTS

E-Commerce Website | *HTML, CSS, JavaScript, Git, VS Code*

LiveLink

- E-Commerce Portal is a website or platform that allows businesses to sell products and services directly to customers over the internet. The purpose of an e-commerce portal is to provide a convenient and accessible way for businesses to reach customers, increase sale.
- Designed, developed, and maintained e-commerce websites, ensuring they are user-friendly, responsive, and optimized for performance.
- Designed custom graphics, animations, and banners using Photoshop and flash.
- Drove website traffic, increased sales, and improved customer retention.

Travelling | *React.js, HTML/CSS,SCSS, Git, window Shell, VS Code*

LiveLink

- Developed a responsive and interactive travelling website using React.js Hooks, HTML, CSS, and JS.
- Implemented a user-friendly interface that allows users to search for and book travel packages, flights, and hotels
- Used React.js Hooks to manage state and efficiently render components.
- Be specific about the features and functionality of the website.

Real Estates Application | *React.js, HTML/CSS,SCSS, Git, window Shell, VS Code*

LiveLink

- Developed a responsive real estate application website using React.js, leveraging functional components and hooks for state management.
- Utilized JavaScript for interactive features, including search filters, property listings, and dynamic content rendering.
